* If the entry in column 1 is less than the entry in column 2, write 1 in column 3.
 * If the "Highest Number Previously Paid For" in THIS SPACE is less than 2's order.
 * If the "Highest Number Previously Paid For" in THIS SPACE is 2's order.

The "Highest Number Previously Paid For" (Total or Independent) is the highest number to add with appropriate frequency, and collection adjustment.

[illegible]

It is important to note that the above results are based on the assumption that the data are normally distributed. If the data are not normally distributed, the results may be biased. Therefore, it is important to check the normality of the data before using the above methods.
